

Sir Harry Smith  
Community College

# **The BSF project,**

## **January to April 2012**

A photo timeline by Jack and Jacob Harris

## January 2012

10/01/12

17/01/12

Two offices that belonged to Mr. Mitchell and Mr. Potter were demolished.

*Similar view,*

13/09/11

24/01/12

Mr. Digby's room, the administration offices and the first aid room were knocked through as work on the new canteen began.

# January 2012

With refurbishment of rooms 6, 7 and 8 (BL17, BL19, BL25) underway, work on the roof began.

The patio area and old entrance steps at the front of the school were removed.

# January 2012

Work on the new classroom block and astro-turf pitch continued.

**February 2012**

The metal frame of the new corridor, linking the extension with the old entrance area, was constructed.

# February 2012

Work progressed fast on the classroom block as rooms inside took shape.

## March 2012

Room 6 (BL17) was refurbished.

Room 7 (BL19) was converted to a science laboratory.

Having been knocked through to incorporate half of the science locker area, The Print Room (BL22) was fitted out to be a science laboratory.

# March 2012

The roof was re-covered. When the school opened in 1953 a layer of white shingle covered the roof to reflect sunlight and keep the building cool. The photo above shows that some of this was still in place nearly sixty years on.

## March 2012

This is the new student entrance foyer, looking towards the old entrance doors.

Work on the new canteen continued.

*Far views of Whittlesey from atop the new block.*

This extension, built where two offices once stood, will accommodate part of the new canteen.

Work continued on the new corridor linking the new block to the school.

## April 2012

With work well underway on the extension for the new canteen, landscaping began on the area outside of it.

The façade of the new block was revealed as some of the scaffolding around it was dismantled.

Scaffolding was erected on the northern side of the building as work on the roof began.
